Tools: Linux, Git, Jira, Confluence, AWS S3, Docker, Kubernetes, Eclipse, VSCode, IntelliJ

EMPLOYMENT SUMMARY

Booz Allen Hamilton, Full-Stack Software Engineer	September 2022 – Present
Interclipse, Full-Stack Software Engineer	January 2022 – August 2022
UMBC Department of Information Technology, RT Web Developer	2019 – 2022
UMBC Department of Information Technology, Windows AD Admin	2017 – 2019

JOB HISTORY

Booz Allen Hamilton, Full-Stack Software Engineer August 2022 – Present

- Department of Labor Foreign Labor Certification (OFLC), FLAG/PERM Modernization
 - Created and assisted the development of an electronic version of permanent residency working visa DOL's Foreign Labor Application Gateway using ReactJS, GraphQL, Kafka, and CosmosDB.
 - Designed and optimized multiple micro-services, significantly enhancing the efficiency and integrity of business logic. Leveraged Express and Kafka to achieve these improvements.
 - Supported operations & maintenance team w/enhancements on existing visa applications, load testing for new releases, and identifying & fixing the issues addressed within help-desk tickets.
 - Refactored multiple GraphQL endpoints to make them more performant, and to cut down on technical debt, by relocating certain core functionality to its own micro-services.
 - Tested and peer reviewed my colleagues' merge requests before merging them into the release branches.
 - Utilized Drupal CMS to efficiently manage DOL's Foreign Labor Application main website.

Interclipse, Full-Stack Software Engineer January 2022 – August 2022

- Worked with a team to create a white-labeled car rental logistics framework, i.e., point of sale web application with brand/location and rate management, and a contactless rental mobile application.

- Helped developed multiple backend microservices containing RESTful and SOAP API endpoints using Java Spring Boot.
- Created numerous views and features within the UI for the web application using ReactJS and Redux and Axios.
- Designed and led multiple front-end and back-end features that were incorporated into the framework.
- Tested and reviewed team members' pull requests using Jira/Bitbucket.

UMBC Department of Information Technology, RT Web Developer

2019 – 2022

- Administered UI design meetings with university leaders to form agreed time constraints and project scope.
- Designed and implemented solutions (HTML, JS, PHP, Bootstrap) that are dynamic towards the users' request, while remaining within the constraints of our API and framework.
- Wrote a python script that auto scrapes web pages and consolidates the information into a singular web page, replacing the manual method and greatly decreasing development time.

UMBC Department of Information Technology, Windows AD Admin

2017 – 2019

- Administered UMBC domain access via PowerShell scripting automation, greatly increasing the efficacy of this position.
- Assisted departments on virtual machine implementation.

Malachite Studios, QA Tester (Intern)

2018 – 2021

- Tested various mobile applications to make sure they fit consistent and clear guidelines
- Wrote detailed logs and bug reports that aided in greatly increasing customer satisfaction and retention
- Helped create and update application designs based on feedback from app store reviews and customer emails

SIDE PROJECTS

- IntendAI: Developed an automated adversarial QA application designed to rigorously test applications by simulating unintended usage scenarios, ensuring robustness and reliability.
- Collaborated with a team to design and develop a game in ReactJS and Django that simulates data structures to teach users about their implementation.
- Developed a python script that leverages a browser manipulation API (Selenium) to automate shopping for online retailers.
- Created a program in C++ that automates personnel assignment to various work roles based on priority and preference.

SERVICE WORK & ACTIVITIES

Phi Kappa Sigma Fraternity

- Risk Chair - Managed and implemented procedures that mitigate the Fraternity's Risk.
- Brotherhood Chair - Creating and organizing events to increase bonds and relations within the Fraternity. Worked closely with the treasurer to create events that were cost effective.
- Volunteer Leukemia Lymphoma Society - Helped raise thousands of dollars that goes directly to fund cancer research. Participated in the yearly Light the Night event, a walk that raises awareness for blood cancers and raises money for research.

CLEARANCES

- DOL Public Trust
